

# Online Firmware Update Manual Instruction

1.After open the firmware, show as following screen.

**Warm Remind:** Connected to PC first, and while successfully auto-installed gamepad driver to PC, pull out USB cable, then continue step 2. "

2.Press " D-pad-Right" button and "L3" button at the same time, then plug USB cable into PC computer.

3. Successfully enter into controller updated screen, press "Update" button and start to update.

PS: Show as below screen when plug into USB cable, please remove USB cable and repeat step 2th.

4. On updating, do not remove the USB cable and make sure it was updated successfully.

5.After updated successfully, the USB cable can be removed.

PS: If update was failed, could be caused by:  
Remove USB cable on updating, bad contact with USB  
cable, bad USB cable ect.  
Please confirm above issues and retry " UPDATE"
